How It Works:

UPTOWN

34"DIA x 34"H

A true classic. Contemporary to traditional the Uptown has the versatility to look comfortable and enhance any setting. From the desert to the tundra our rugged UV protected double wall constructed planters are nearly indestructible standing up to the harshest of environments. An extra large water reservoir allows this planter to go up to 3 weeks without requiring more water.

COSMOPOLITAN

30"L x 30"W x 36"H

Stately and statuesque, the Cosmopolitan planter is sure to get noticed. Pairs up nicely with the Metropolitan self watering planter and looks stunning in mixed groupings. From the desert to the tundra our rugged UV protected double wall constructed planters are nearly indestructible standing up to the harshest of environments. An extra large water reservoir allows this planter to go up to 3 weeks without requiring more water.

METROPOLITAN

36"L x 36"W x 31"H

Clean lines give the Metropolitan a fresh modern appearance which is sure to brighten and rejuvenate any urban area. It pairs nicely with the Cosmopolitan. From the desert to the tundra our rugged UV protected double wall constructed planters are nearly indestructible standing up to the harshest of environments. An extra large water reservoir allows this planter to go up to 3 weeks without requiring more water.

HANA

20"DIA x 10"H

Sometimes good things come in small packages. Although smaller in stature these contemporary bowl style planters are big on style and designed to make the most out of any limited space area. From the desert to the tundra our rugged UV protected double wall constructed planters are nearly indestructible standing up to the harshest of environments. A high capacity water reservoir allows the Hana to go up to 6 days without requiring more water.

BREEZE

20"DIA x 10"H

Hanging planters have always been the biggest challenge for gardeners. Exposed to all of the elements hanging planters dry out quickly and demand a lot of care. The Breeze Hanging planter is equipped with a high capacity water reservoir allowing this hanging planter to go up to 6 days without requiring water even during the hottest of summer days. Plant food can be added directly to the reservoir providing a continuous supply of nutrients resulting in impressive blooms.

MIRAMAR

60"L x 16"W x 33"H

Sleek and stylish in design, the Miramar is visually stunning. Having a fairly narrow footprint makes the Miramar a perfect choice to line sidewalks, boulevards, patios, and store fronts. From the desert to the tundra our rugged UV protected double wall constructed planters are nearly indestructible standing up to the harshest of environments. An extra large water reservoir allows the Miramar to go up to 3 weeks without requiring more water.

MANHATTAN

36"L x 36"W x 30"H

Contemporary meets tradition. The Manhattan planter features soft flowing lines that add a beautiful touch to any urban setting. Equipped with a large water reservoir, the Manhattan planter will go 2 weeks in between watering. Double-wall constructed, UV protected, and graffiti resistant make it the perfect choice for any busy urban area. Available in a wide variety of colors.

WELLINGTON

24"L x 24"W x 24"H

The popular, clean finished, Wellington Cube looks stunning planted with boxwoods, perennials, or colorful annuals. Create a stylish statement on any streetscape. A perfect choice for any commercial application including patios, store fronts, sidewalks, or lining bicycle & pedestrian lanes. Molded from polyethylene, all of our planters are extremely durable and designed to withstand the wear & tear of public urban environments. Urbanscape Planters are flexible, impact resistant, and specifically treated with UV inhibitors to prevent fading. The only self watering planter on the market to feature drain free winterization. A perfect balance of design, functionality, and durability.

HAMPTON

46"L x 13"W x 28"H

You've asked, we listened. Introducing the highly sought after sleek & contemporary Hampton self watering planter. Combining design with durability, the Hampton is a perfect choice for any commercial space. Crafted from UV protected thick gauge polyethylene, Urbanscape Self Watering Planters are resistant to all weather related cracking and fading even in the harshest of environments. The Hampton features drain free winterization, and thanks to our leading self watering technology there is never a risk of over or under watering. A perfect balance of design, durability, and functionality.
