How Urbanscape Self-Watering Planters Work

1. Fill Port & Plug

All of our planters are made with a simple fill port and durable plug. Simply use a garden hose to fill your planter when the water level gets low.

2. Insulating Double Wall Construction

Constructed using UV-protected commercial-grade polyethylene. Our four-season planters are known for their durability and resistance to fading, cracking, and other weather-related damage. No winterizing is required. 10-year Warranty.

3. Overflow Drain

Prevents flooding and root rot.

4. Large Water Reservoir

Never worry about over or under-watering again. Our large-capacity water reservoirs provide consistent moisture levels for several weeks. Plants receive the right amount of water when they need it, leading to stronger roots and better overall plant health. Plant food can be added directly to the reservoir for a continuous flow of nutrients.

5. Wicking Chamber

Our all-natural wicking system is free of any moving parts or synthetic wicking materials prone to mold and replacement. As the potting mix dries out, it pulls water from the reservoir, ensuring that the plants receive a steady supply of moisture without the risk of overwatering.

Reduce Water Consumption

Save up to 75% in water consumption. Our closed system water reservoir makes our self-watering planters very water efficient because the water is stored away from the drying effects of the sun and wind.

Reduce Labor

Our self-watering planters only need to be filled with water every 2-3 weeks eliminating the high labor costs associated with daily maintenance. Let's put our labor to better use!

Reduce Waste

Urbanscape Self Watering Planters is committed to using a minimum of 50% of recycled material that would otherwise end up in our landfills and oceans.

UPTOWN PLANTER

Starting at \$199

34"DIA x 34"H

28"DIA x 30"H

24"DIA x 24"H

A true classic. Contemporary to traditional the Uptown has the versatility to look comfortable and enhance any setting. Crafted in North America from UV protected thick gauge polyethylene, the Uptown is resistant to all weather related cracking and fading even in the harshest of environments. It features drain free winterization, and thanks to our leading self watering technology there is never a risk of over or under watering. A perfect balance of design, durability, and functionality.

COSMOPOLITAN

30"L x 30"W x 36"H

Sleek and elegant, the Cosmopolitan is perfectly tapered for balance and display. It is a perfect choice to add a contemporary feel to any urban space. Crafted in North America from UV protected thick gauge polyethylene, the Cosmopolitan is resistant to all weather related cracking and fading even in the harshest of environments. It features drain free winterization, and thanks to our leading self watering technology there is never a risk of over or under watering. A perfect balance of design, durability, and functionality.

METROPOLITAN

36"L x 36"W x 31"H

Clean lines give the Metropolitan a fresh modern appearance which is sure to brighten any urban area. Crafted in North America from UV protected thick gauge polyethylene, the Metropolitan is resistant to all weather related cracking and fading even in the harshest of environments. It features drain-free winterization, and thanks to our leading self watering technology there is never a risk of over or under watering. A perfect balance of design, durability, and functionality.

BREEZE PLANTER

20"DIA x 10"H

Hanging planters have always been a challenge for urban areas. Exposed to all of the elements, hanging planters dry out quickly and demand a lot of care. We have the solution! The Breeze Hanging planter is equipped with a high capacity water reservoir allowing this hanging planter to go up to one week without requiring water, even during the hottest of summer days. Plant food can be added directly to the water reservoir providing a continuous supply of nutrients resulting in impressive blooms.

CAMBRIDGE HANGING PLANTER

20"L x 20"W x 11"H

The Cambridge hanging planter is ideal for hanging from street light posts. It is constructed from weather-resistant commercial grade material that will not crack or fade even in the harshest of environments. It comes equipped with a water reservoir that will provide one week in between watering and heavy duty rust proof stainless steel hardware and chains. Add some color to your streetscape.

MANHATTAN PLANTER

36"L x 36"W x 30"H

Contemporary meets traditional.

The Manhattan is a versatile planter that features perfectly placed lines and smooth curves that come together to add an elegant touch to any urban setting. Crafted in North America from UV protected thick gauge polyethylene, the Manhattan is resistant to all weather related cracking and fading even in the harshest of environments. It features drain free winterization, and thanks to our leading self watering technology there is never a risk of over or under watering. A perfect balance of design, durability, and functionality.

WELLINGTON CUBE PLANTER

24"L x 24"W x 26"H

Create a stylish statement. The popular, clean finished, Wellington Cube is a perfect choice for any commercial application including patios, store fronts, sidewalks, or lining bicycle & pedestrian lanes. Crafted in North America from UV protected thick gauge polyethylene, the Wellington Cube is resistant to all weather related cracking and fading even in the harshest of environments. It features drain free winterization, and thanks to our leading self watering technology there is never a risk of over or under watering. A perfect balance of design, durability, and functionality.

HAMPTON PLANTER

46"L x 18"W x 28"H

The Hampton self-watering planter is designed with a rectangular shape and a slight curve for a more modern and decorative appearance. It is the perfect choice for lining patios, sidewalks, and storefronts. Roto-molded using thick gauge polyethylene, the Hampton is known for its durability and resistance to harsh weather conditions. It is UV & crack-resistant and comes with a 10-year warranty.

SILHOUETTE LOW BOWL PLANTER

54" DIA x 17" H

The Silhouette Low Bowl planter has a unique contemporary low profile that creates a colorful impact without blocking sight lines. Boasting over 15 square feet of planting area makes it the perfect choice for showcasing plant arrangements. Crafted in North America from UV protected thick gauge polyethylene, the Silhouette low bowl is resistant to all weather related cracking and fading even in the harshest of environments. It features drain free winterization, and thanks to our leading self watering technology there is never a risk of over or under watering. A perfect balance of design, durability, and functionality.

KINGSTON PLANTER

30"L x 13"W x 36"H

It's time to redefine outdoor spaces. The sleek & modern Kingston planter is a perfect addition to freshen up any store front, patio, sidewalk, or commercial space. Engineered for the harshest of climates, the Kingston self watering planter is crack & fade resistant.

URBANSCAPE

10-YEAR WARRANTY

Urbanscape Self-Watering Planters stands by the quality of our commercial self-watering planters. Each planter holds a **ten (10) year warranty** from the time of receiving the product. We warrant the initial purchaser of our products that they are of quality material, workmanship, and against any reasonable weather related cracking or fading.

Urbanscape Self-Watering Planters, at their sole discretion will repair, exchange, or provide credit of the original purchase price of any item proving to be defective. Mishandling, misuse, abuse, failure to follow directions for use, unauthorized modifications, neglect, or accidents voids the ten year warranty.

Please note that **Urbanscape Self-Watering Planters** will not be liable for labour, shipping, delivery, or any other costs associated with a claim.
